Defining Externalities

- **Externalities.** An *externality* occurs whenever the activities of one economic actor affect the activity in ways that are **not** reflected in market transactions.

- $l_x + l_y = l$

產品	命名方式
椅子、書桌	男生的名字
織物、窗簾	女生的名字
花園造景	瑞典島嶼
床上用品	花卉、植物
兒童用品	哺乳類、鳥類名稱
廚具	香料、草藥、水果

Lists in Beamer

- $y = \beta_0 + \beta_1 x_1 + u_i$
- $u_i \stackrel{i.i.d.}{\sim} N(0, 1)$
- $\frac{\partial f(x)}{\partial x}$
- Similar to $n = 2$ case above, we can set up the Lagrangian expression, take first-order condition, solve, and result in equation $y_A = 2[x_A + (n - 1)x_B] = 2x$ as before.

$$x_A^* = \frac{10}{2n + 1}$$

Blocks in Beamer

Standard Block

This is a standard block.
